## WHAT IS THE IDEA BEHIND HX?

At HX we believe that people should not only recycle but also reuse.

It is evident that we need to build a more sustainable relationship with our planet.

But how?

- Live simpler – Get what you need, not what you want
- Consume less – Whatever you need, use them for longer

We understand that it is easier said than done.

Creating aspirations is BIG business. And encouraging use-n-throw behavior seems to keep the companies alive and the economy growing.

Well, that's where our idea comes in –

- Help our users find what they truly need
- Make reuse the 'In' thing

Two small ripples that could create some pretty giant waves:

What do we achieve together

- Aspirations are met – You get to take home something really cool
- A different kind of factory thrives - One that focuses on repair rather than just manufacture thereby reducing the carbon footprint

This way, the planet smiles & everybody wins.
